Morbidity refers to the unhealthy state of an individual, while mortality refers to the state of being mortal. Both concepts can be applied at the individual level or across a population. For example, a morbidity rate looks at the incidence of a disease across a population and/or geographic location during a single year. Mortality rate is the rate of death in a population.

Risk Meter Low Medium High Infant mortality rate is defined as the death of an infant before his or her first birthday. It is a useful indicator on the nation's health because it is often associated with other health

### **Risk Meter - Statistics at UC Berkeley**

Mortality rate, or death rate, is a measure of the number of deaths (in general, or due to a specific cause) in a particular population, scaled to the size of that population, per unit of time. Mortality rate is typically expressed in units of deaths per 1,000 individuals per year; thus, a mortality rate of 9.5 (out of 1,000) in a population of ...
