Adapting to the Impacts of Drought by Smallholder Farmers in Sekhukhune District in Limpopo Province, South Africa Article (PDF Available) · January 2015 with 4,142 Reads DOI: 10.5539/jas.v7n2pxx

### **Adapting to the Impacts of Drought by Smallholder Farmers**

Water is scarce, much like other inputs to agricultural production – land, labor, nutrients. Drought is a key form of water scarcity for agricultural production. Farmers, commodity markets, and governments are involved in drought response. Farmers adapt to drought risk in many ways – land use, crop choice, irrigation investment, and

The road to that future won't be easy. The better-poised farmers, with the right technology, land, and money, will gain.

### **Farmers adapting to drought challenge - The San Diego**

A total sample of 153 smallholder farmers was randomly selected from Gogonyo, Kameke, Kamuge and Kasodo sub-counties and administered household questionnaires. The study results revealed that there was a very significant relationship between literacy (reading and writing) and adaptation to drought by the smallholder farmers ( $p < 0.05$ ).

AFTER THE DROUGHT The 2012 drought, Russian farmers, and the challenges of adapting to extreme weather events Extreme weather events are becoming increasingly common in Russia, and the 2012 drought confirmed this trend. However, Russia still has only a small number of specific agricultural adaptation measures in place.

Semi-structured questionnaires were held with farmer households to explore the real impacts of climate change and drought on the local agriculture by collecting first-hand information from the farmers on their agricultural production and adaptation actions to drought.

### **How smallholder farmers adapt to agricultural drought in a**

Livestock farmers were the most resilient to drought. Some of the strategies adopted by the farmers dated back centuries. Migration with animals to better grazing lands was one of the oldest coping mechanisms used by livestock farmers. Farmers also purchased lucerne from other farmers or far off areas to feed their animals.
