ACC/AHA 2008 guidelines for the management of adults with congenital heart disease: a report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Writing Committee to Develop Guidelines for the Management of Adults With Congenital Heart Disease). *Circulation*. 2008;118:e714-833.

ACC/AHA 2008 Guidelines for the Management of Adults With

Most adults with CHD have less "reserve" than people who weren't born with a heart defect. This can be due to the underlying diagnosis, coexisting lung disease, physical deconditioning or other reasons. This makes optimizing fitness even more important. For adults with CHD, this reserve is important when our bodies are stressed or we become ill.

Exercise and Adult Congenital Heart Disease - ACHA

The indications for ICD implantation in adult congenital heart disease were published in a 2014 consensus statement.⁴⁸ The same indications apply to children with congenital heart disease. The type of system used can be either transvenous, epicardial, subcutaneous, or hybrid.

Adult Congenital Heart Disease - an overview

CONGENITAL HEART DISEASE IN ADULTS 375
Aortopulmonary Shunts
Depending on their age, adult patients may have had one or more of several aortopulmonary shunts to palliate cyanosis during childhood. These are shown in Figure 16-1. Although life saving, there were considerable shortcomings of these shunts in the long term.
