vation, and publication. By necessity (but also through the involvement of those in power), Naples emerged as a leading center for the development of restoration methods and practices. We can argue a similar case for bronze sculptures. Prior to the first excavations at Herculaneum, in 1738, surviving large ancient bronzes were relatively few.

Chapter 1: Introduction

The ancient Greeks and Romans had a long history of making statuary in bronze. Literally thousands of images of gods and heroes, victorious athletes, statesmen, and philosophers filled temples and sanctuaries, and stood in the public areas of major cities.

Bronze statues were regarded as the highest form of sculpture in Ancient Greek art, though survivals are few, as bronze was a valuable material in short supply in the Late Antique and medieval periods. Many of the

most famous Greek bronze sculptures are known through Roman copies in marble, which were more likely to survive.

Bronze - Wikipedia

The sculpture of ancient Greece from 800 to 300 BCE took early inspiration from Egyptian and Near Eastern monumental art, and over centuries evolved into a uniquely Greek vision of the art form. Greek artists would reach a peak of artistic excellence which captured the human form in a way never before seen and which was much copied.
